

Dandelion Nozzle

Description - This nozzle consists of a large no of independent nozzles mounted on top of a central cast Bronze ball. Depending upon the adjustment of the nozzle tips the effect can change from fine mist to a fine film of water creating a large ball of mist or bell effects that look very appealing especially when lit at night. The visibility of the ball with multiple arms when not in operation is a drawback of this nozzle and its use is preferred in public parks or play areas. This nozzle requires clean filtered water in the pool and a very fine mesh screen on the pump suction to keep the nozzles from getting blocked with debris.

Sizes - Available as a full ball of 1m to 3m or a Half ball of 1.5m to 2m

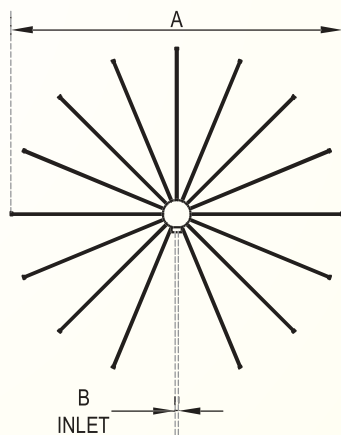

MOC - Cast Bronze, Aluminum, Machined Brass. With brass or chrome finish on the ball and nozzle tips and powder coating on the Aluminum arms.

Custom - Length of arms can be customized to vary the overall ball size.

Type - Water level independent (no change in water effect with varying water level)

Dimensions

SAP Code	MODEL	A	Inlet (B)	No. of Arms
NOZ8.02	Dandelion 3/71	3.0m	65mm	71
NOZ8.03	Dandelion 2/71	2.0m	65mm	71
NOZ8.04	Dandelion 1.5/71	1.5m	65mm	71
NOZ8.05	Dandelion 1/35	1.0m	50mm	35
NOZ8.06	Half Dandelion 1.5/47	1.5m	50mm	47
NOZ8.07	Half Dandelion 2/47	2.0m	50mm	47
